

ShopEZ – Empathy Map Canvas

Date: 18 June 2026

Project Name: ShopEZ – E-Commerce Shopping Platform

Developer: Individual Project

Empathy Map: Online Shopper

This empathy map represents the perspective of a customer who regularly shops online and expects a convenient, secure, and efficient shopping experience.

SAYS

• “I want to find products quickly and easily.” • “I prefer websites that are simple to navigate.” • “I want genuine reviews before making a purchase.” • “I expect secure payment options.” • “I like receiving discounts and special offers.”

THINKS

• “Is this product worth the price?” • “Can I trust this seller and website?” • “Are there any better alternatives available?” • “Will my order arrive on time?” • “Is my payment information secure?”

DOES

• Searches for products using keywords. • Compares prices and product features. • Reads customer reviews and ratings. • Adds products to the shopping cart. • Places orders and tracks deliveries. • Uses mobile devices for browsing and shopping.

FEELS

• Excited when finding desired products. • Confident when reading positive reviews. • Concerned about payment security. • Frustrated by slow websites or difficult navigation. • Satisfied when receiving products quickly and accurately.

KEY INSIGHTS

• Customers prioritize ease of use and fast navigation. • Product reviews and ratings strongly influence purchasing decisions. • Secure authentication and payment handling increase customer trust. • Mobile responsiveness is essential because many users shop

through smartphones. • Personalized recommendations and discounts improve user engagement and retention.

CONCLUSION

The empathy mapping exercise highlights the importance of creating a user-friendly, secure, and responsive e-commerce platform. ShopEZ focuses on providing an intuitive shopping experience, trusted product information, secure transactions, and efficient order management to meet customer expectations.
